

Pre-ride Announcements (start 9:55 am)

1. Choose **language** (according to what people understand)
2. Anyones' first time? Give them a warm welcome (+ make a mental note)
3. Present ride leaders (names + pronouns)
4. **"Social ride-Pace" = Comfortable pace for everyone**
 - a. shout ahead if pace is too high; people getting dropped, etc. & pass on anything you hear
5. Ride etiquette:
 - a. **Follow public road rules**
e.g. no freihändig, groups larger 16: people behind are allowed to pass light that just changes to red
 - b. **Keep the group together**
follow the back wheel as much as possible, no fast acceleration (especially coming out of traffic lights/around corners)
 - c. **No sudden braking**
 - d. **Hand signs**
Left/right, obstacle at left / right, caution, stop (+general importance of communication - always repeat the sign from person in front; encourage all riders to kindly remind people riding in front of them. to show hand signs if not done properly)
6. Climb etiquette:
 - a. **Everyone at their own pace**; wait at the top
 - b. Quick riders are encouraged to come back down and ride up with people behind
 - c. **Take descents slowly and very carefully**
7. **Overview of the route** (particularly the climbs)

This is an anti-discriminatory ride. That means we expect mutual respect and solidarity from everybody, and that any kind of discrimination is opposed.

In case any one of you experiences discrimination or abusive behaviour, you can always tell one of us. In such cases we will form an awareness team (if you wish), and in particular apply adequate measures to ensure that everyone can feel as good as possible during our rides.

["We" is, the leader, at least one other person if the ride is more than 10 people, hopefully also a FLINTA person. Introduce them.]*

8. Photos:

- a. People should indicate if they don't want to be on photos/ Instagram

Notfall Guideline (unfinished)

- If anyone crashes, stop the whole group and ensure everyone gets off the road
- Talk to the person(s) involved in the crash and decide if an ambulance is needed
 - Ask easy questions (Name, Date, Place, ...)
- Do not let anybody ride home alone

Before the Ride

- The route should be flat every other week (<300hm) and not too hilly the other weeks (<500hm) - when planning routes "Fahrradwege" should be avoided
- **Groups larger than 25 people are split randomly** in two (independent of speed or desired distance) with a minimum separation of 5 minutes.
- For short & long rides: regroup at some pre-arranged point during the ride and split again according to distance.
- The announcements start at **09:55** so that the first group can **start on time at 10:00**. The second group then consists of anyone who shows up later.
- Each group should have **two ride leaders**:
 - These can be chosen spontaneously before the ride, and can be anyone who has been to the social ride several times before. You do not need to be fast/fit, and we actively aim to select a diverse group of people where possible.
- Count the number of people in each group and make sure both leaders know how many there are.

During the ride

- Ride leaders:
 - **One leader** should ride within the first couple of rows, ensure the route is followed and that the tempo remains social and the group stays together - try not to get carried away or lost in conversation. If you don't have a bike computer, find someone who does and is willing to ride consistently at the front.
 - **The other leader** should ride within the last couple of rows and ensure everyone is comfortable with the pace and the group remains together. Shout instructions to the group ahead (e.g. **show hand signs**, slow down, don't leave such big gaps, stay together through lights, no sudden braking etc.). If someone is dropped or needs to stop, immediately shout forwards to the group to stop.
 - The back leader should **always** be the last person up the climbs and down the descents. Ideally, you should try to collect a small group of people who will ride at the back together and chat up all of the climbs, so that the last person doesn't feel alone. Ensure that the last person to the top of climbs gets a substantial rest - don't just set off again as soon as they've taken a sip of water. Reiterate the importance of riding carefully on the descent.

- **Please take photos** whenever safely possible (- not while riding-) and upload to the Google Photos of the community
- Watch out for anyone who is riding with us for the first time, especially if they are generally new to cycling. Ideally have ride leaders and/or just experienced/Orga people ride with them for the first few km and make them feel welcome. Likewise, actively try to encourage people who are less fast/experienced, on gravel bikes, or for whatever reason might be unsure if they are in the right spot, and make it clear that they are welcome here.
- If someone cannot keep up with a **minimum speed of approx. 23 kph** in the flats, please approach that person and discuss options. One solution might be to have one to three persons accompany them back while the rest of the group goes ahead.
- If someone approaches you saying they were discriminated against or don't feel comfortable with one of the people in the group: don't question the claim but comfort them, and immediately approach the person they are concerned about, excluding them from the ride in serious cases (after contacting Orga group). TODO more explicit guidance here.
- As a group we are allowed to ride together on the street. But, **it is also mandatory by the StVO to let other vehicles pass** in appropriate intervals and where it is safe.
- During breaks, remind all riders of the importance of hand signs and passing them on to the back.

After the ride

- Record the number of people/women present in the spreadsheet - TODO
- Reiterate that anyone who does not want to appear on social media should approach/privately message one of the ride leaders, and make a note of anyone who does this.
- Remind people that we have a feedback form and any comments are welcomed, then send this into the group chat immediately after the ride.

Verpflichtende Workshop Teilnahme

- Alle ride leader sollten an einem Workshop zum Thema Awareness teilnehmen. Diese sollen regelmäßig angeboten werden.
